ABOUT ME

I'm a highly driven developer with full-stack experience and a passion for frontend. I thrive in energetic, creative, and collaborative environments where I can help to build great products and continue to grow.

WORK EXPERIENCE

Software Engineer

Working Not Working

2021-2023

- Worked with small team of developers to implement an agile workflow building out full-stack components, including onboarding flows, status updates, profile and project pages
- Converted complex designs to pixel-perfect web pages
- Wrote unit tests for all new functionality to ensure all code worked as intended
- Collaborated cross-functionally with internal teams through the entire dev process from project kickoff, design, QA, deployment, and updates

Web Developer

Atelier Ace

2019-2021

- Assisted in building and maintaining the Ace Hotel website including all properties + blog
- Built and managed 13 food and beverage websites, each with unique identity and branding
- Worked closely with Design and Marketing teams
- Worked daily with ticketing systems to manage workflow and ensure on-time delivery of all assets

Software Engineer

Misc.

2018-Present

- Working with clients across industries to create custom sites that reflect and elevate the user experience and design vision
- Partnering with brands and designers using Figma and other collaborative tools to transform ideas and designs into intuitive and engaging web experiences
- Collaborating with other engineers using Github/Git Delivering responsive, cross-browser compatible and SEO- friendly websites
- Clients include: Redesign Health, Hugo & Marie (Elyse Walker), Thinkingbox (L'Oreal), Gates Creative, Made by Grizzly, Studio LaRocca
